PROFILE

Skilled and motivated web developer with a background in frontend and some knowledge in backend technologies as well.

Learned by developing projects with TypeScript for static typing, following good practices like SOLID and design patterns like Atomic Design, clean architecture like Domain Driven Design (currently learning), and recently made a small API based on Model View Controller.

My main tools are React with TypeScript for static typing and CSS preprocessors like SASS for styles but I can adapt to new technologies if needed.

Currently seeking for new experiences and challenges.

EXPERIENCE

Z-ECONOMY

(Frontend)

Budget management web app based on YNAB I have made for personal use and to demonstrate my ability to develop based on a given design. Made in React with Vite, Typescript, SASS, react-table, Axios, Supabase for user management and validation and agile SCRUM methodology for coordination with backend developer

PORTFOLIO

Static website made in order to showcase the projects I have done. Used Gatsby with TypeScript for faster site loading and better SEO performance and SASS for styling.

URL SHORTENER

Uuidv4 based URL shortener app with its own API I made for it. Used React with Vite, TypeScript, SASS and DDD for the frontend, The API is made with Nest, TypeScript and MVC design pattern.

EDUCATION

UNIVERSITY "INSTITUTO CATOLICO DE ENSEÑANZA SUPERIOR (ICES)"

Software Development - 2020-2023
